radio

KY 535.

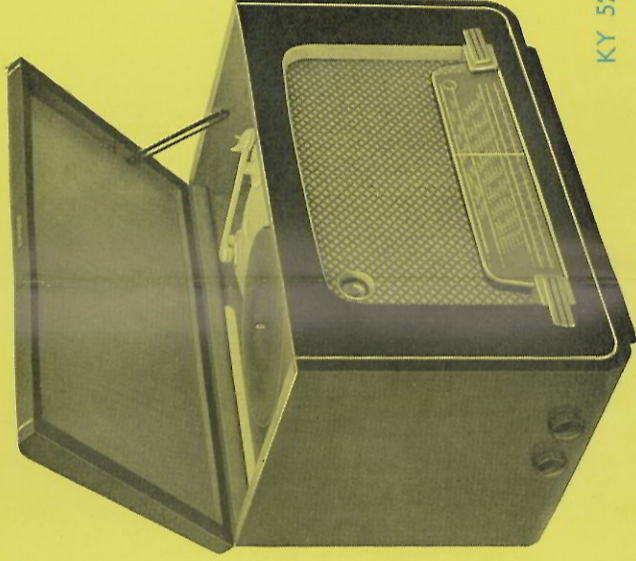

KY 535. A graceful set with lifelike reproduction, having 6 valves and 3 wave-ranges. Connection for pick-up and external loudspeaker. A special FM converter may be built in for the reception of FM transmitters.

KY 537. Beautifully styled set with magnificent sound reproduction. It has 7 valves and gives reception both of FM and AM transmitters. Three AM wave-ranges, 100-87 Mc.s FM range, reception of local FM transmitters possible by built-in FM dipole aerial. P.M. loudspeaker measuring 21 cm (8"). Connections for pick-up and external loud-speaker. The KY 5373 with 6 AM wave-ranges is supplied for those territories where FM transmissions are not available. Tropicalised version is type KY 5371. Same sets for AC and car battery are the types KY 5373 AV and KY 5371 AV (tropicalised), whereas KY 5373 B and KY 5371 B (tropicalised) are dry-battery sets.

KY 537.

KY 5265. A radio-gramophone of very fine qualities. 6 valves, 3 wave-ranges and two spread short wave bands. Record player suitable for 33 $\frac{1}{3}$, 45 and 78 speeds. Feather-weight pick-up; 21 cm (8") loud-speaker. Possibility for adding FM converter for reception of FM transmitters. Same set in tropicalised version, but with 4 continuous wave-ranges, is supplied as KY 5266.

KY 5265.

KY 538. A receiver with 7 valves and rectifying valve of exceptional qualities. Allows reception both of FM and AM. Apart from FM, four AM wave-ranges between 14.5—2000 m. Built-in FM dipole aerial. Two loud-speakers, 21 and 17 cm (8" and 7"). Equipped with 7 push-buttons. Connection for pick-up and external loud-speaker.

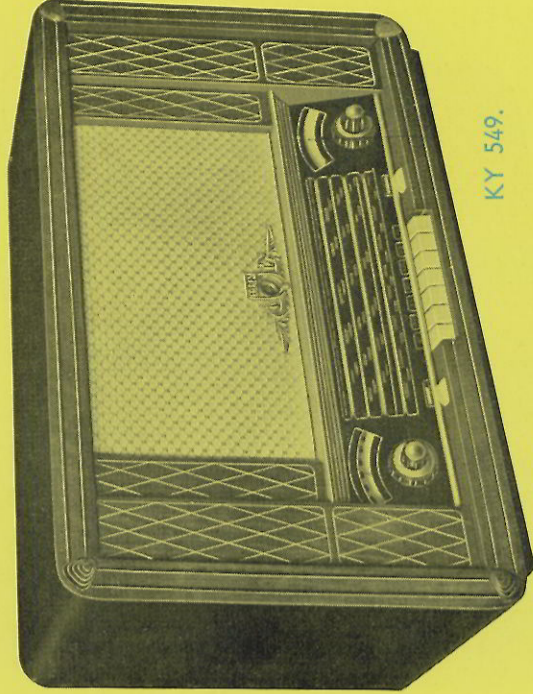

KY 538.

KY 536.

KY 536. A nique set, both as to its appearance as to its technical qualities. Suitable for AM and FM reception. Three AM wave-ranges, reception local of FM transmitters being possible by built-in FM dipole aerial. 8" (21 cm) loud-speaker. The type KY 5363 with four AM wave-ranges is supplied for those territories where FM transmissions are not available. Its tropicalised version is the KY 5361.

KY 549. A most distinguished set with 8 valves and rectifying valve, allowing reception of AM and FM. Four AM wave-ranges between 14.5 and 2000 m. Continuous bandspread between 14.5 and 52 m. Revolving ferrite aerial and FM dipole are built in. Two loud-speakers: 26 cm and 17 cm (10" and 7"). Seven push-buttons. Mutually independent and visible control of bass and treble. Selectivity control. Fly-wheel tuning. Connections for pick-up and external loud-speaker.
