

## Industrial vacuumcleaner **IS 150**

VAN DER HEEM N.V.-THE HAGUE-HOLLAND

The Van der Heem Industrial IS 150 has been designed for use in large localities for cleaning all types of floors. It is of a simple design and working with this wheeled machine is an easy job. Any cleaning operations can be done quickly and thoroughly thanks to its powerful suction. Special safeguards in motor, switch and other current-carrying parts make the Van der Heem Industrial a perfectly safe machine, even after long years of intensive use.

The attachments supplied with each machine meet the highest requirements of efficiency and thorough workmanship.

A range of special accessories has been designed for particular applications so that the versatility of the machine is almost unlimited.

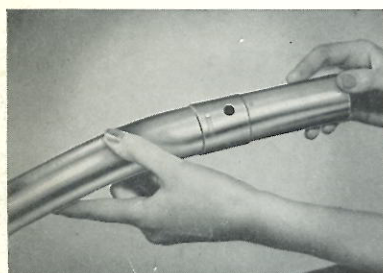

The purchase price of the IS 150 has been kept so low that it will pay itself back within one year by the savings it allows to be effected.

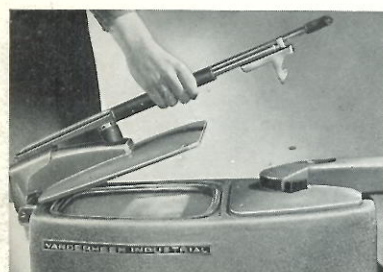

# Industrial vacuumcleaner IS 150

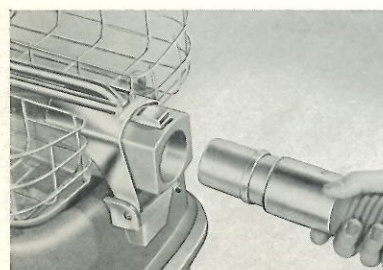

The lightweight machine can be easily moved about on its 3 wheels.

The enormous suction power of the IS 150 can be tailored to the job with the suction regulator.

The double insulated machine is perfectly safe to operate.

Swivel connection of hose to machine facilitates operation and avoids wear.

**Description.** The industrial vacuum cleaner is a rugged, soundly engineered job, built to last. The steel casing is finished in frosted grey enamel and provided with a rubber protection rim.

Wheels of ample dimensions make handling and manoeuvring easy.

The filterbag cover and the power unit foundation are aluminium castings ensuring rigidity and durability.

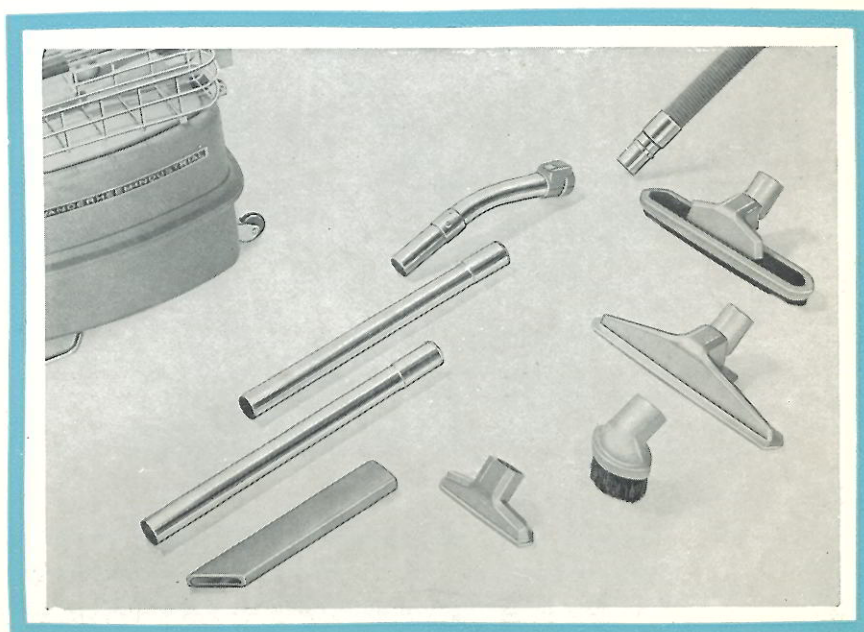

Powerful suction unit and very capacitive dustbag. The dustbag can easily be taken out vertically.

**Power Unit.** The VAN DER HEEM INDUSTRIAL IS 150 embodies a powerful suction unit. The motor is for both AC and DC and can be supplied for all standard voltages.

It is flexibly mounted, double insulated and of lasting construction.
